

Press Release1st December 2022**ACM Parts' New Queensland Distribution Centre**

ACM Parts has executed a lease for a distribution centre located at 9 Anton Road in Hemmant, Queensland.

A key element of the AMA Group strategy is growth of the ACM Parts supply business, which is supported by the move to this larger facility, which offers over 19,000m² of warehouse capacity, an increase from the current facility's 5,600m².

The site is optimally located in proximity to the Port of Brisbane and the Gateway Motorway, allowing ACM Parts to better match the geographical spread of its customer base. The facility is also equipped with direct access from covered loading bays and significant hardstand area. The larger facility will support the expansion of ACM Parts' reclaimed, new, and aftermarket parts as well as consumables.

Executive General Manager, Adam O'Sullivan said "this new distribution centre will allow us to expand ACM Parts' inventory holdings and build a stronger position within the mechanical and collision supply market."

"The new facility is more modern than our existing facility in Queensland, and I am excited about the opportunity for our Team members to build their experience in the new location. It also provides an opportunity for advancement for our current Team members as we grow our staffing levels."

ACM will commence the move into the new facility in late February 2023 and expects to be fully operational from the site from March 2023.

**Ends.**
